

## **Shabbat Shalom fellow lunar Sabbatarians!**

Today, 03-13-21, although coincident to the Roman Gregorian calendar solar Saturday, it is the authentic 2nd lunar Sabbath of our Creator's Twelfth Lunar Month.

He placed His full moon beacon as the original New Moon and start of His months, high above for all to see. All praise to YAHUAH Alahim for His steadfast love and compassion for His children, and His patience in restoring His long lost truths in preparation for the Second Coming of His Son, Yahusha haMashiach (the Messiah). Simply because the full moon as New Moon, with its count to Lunar Sabbaths, and annual Feast Days are not popular among the Rabbinical Pharisee Jews or the Romanized Christian churches today, does, in no way diminish its LIGHT OF TRUTH shining from the pages of Scripture and His Eternal Throne. Only YAHUAH'S Ruach (power, presence, and provision) gives those who seek Him with all their hearts, "eyes to see and ears to hear." Ask Him today to reveal His New Moon and lunar Sabbath to you and see how your life will change as your soul temple is synchronized to His.

## **Launch Out into the Deep**

By Denise Shaw Seibold

“So it was, as the multitude pressed about Him to hear the word of Yahuah Alahim that He (Yahusha the Messiah) stood by the Lake of Gennesaret, and saw two boats standing by the lake; but the fishermen had gone from them and were washing their nets. Then He got into one of the boats, which was Simon’s, and asked him to put out a little from the land. And He sat down and taught the multitudes from the boat. When He had stopped speaking, He said to Simon, ‘Launch out into the deep and let down your nets for a catch.’ But Simon answered and said to Him, ‘Master, we have toiled all night and caught nothing; nevertheless at Your word I will let down the net.’ And when they had done this, they caught a great number of fish, and their net was breaking.” Luke 5:1-6

Catching nothing after a disheartening and exhausting night, Peter and the other disciples, all accomplished fishermen, were asked by Yahusha, the Messiah, to do just the opposite of what made good sense. Normally they would fish at night in the shallow water, now they were doing the opposite, fishing during the day and in deep water. But despite going against what was usual and customary, Peter obeyed Yahusha’s command... “nevertheless at your word.” By faith he did what the Master was asking even though it made no sense. And, remember, he was risking failure in front of a great crowd of spectators watching from the shore.

Note that Yahusha’s command was twofold. First, “put out a little” and when Peter obeyed this seemingly simple request, He gave the second, “launch out into the deep.” If Simon had not obeyed the first command, he would have been in no position to do the next and never would have experienced the miracle that was about to occur.

Yahusha never gives us a road map of what He asks us to do. He tells us just enough so we must step out in faith. We must “thrust out a little” and obey the first command so we will be prepared to “launch out into the deep” when the Master speaks. We must “be faithful in the very little things to have authority over much.” (Luke 19:17)

Oh, and remember the crowd on the shore? Do we often ask, what will people think? What if I fail? How will this look? Will the Master come through for me? Yahusha is that you? Yahusha the Messiah is looking for willing, yielding people who fully trust Him, no matter what the cost.

Prayer: Master, when You say, “Whom shall I send, and who will go for us,” I want to say, as did Isaiah, “Here am I! Send me.” Please increase my faith to do those things You are calling me to do. In Your precious name I pray.

---

I pray this day finds you well and blessed. This Sabbath message by Denise Shaw perfectly ties into some things that I need to share with you today.

I have a miraculous story of coming into the knowledge of the lunar Sabbath. You can read an early portion of the journey here at [My Dream and Journey](#). When I first began learning of the New Moon in 2007 I was taught that it was the first *visible crescent* by the women who I trusted as my instructors at the time. I challenged them in my infancy of the New Moon status quo, stating “wouldn’t our Creator have made the full moon His New Moon so that none would ever be in question or confused over the New Moon crescent?” They reminded me that William Miller had utilized the crescent of the Karaite Jews to locate the Day of Atonement of October 22, 1844, which later became known as the “Great Disappointment.” Ellen White had then continued to uphold that date as the true date for the Day of Atonement.

By 2012 *TheCreatorsCalendar.com* website had been in full swing for five years declaring the first visible crescent was the New Moon. I had been posting calendars each year, and had over 3,000 folks on the email list. Things were really hopping as most of us had come out of the churches and were discovering many exciting things.

But I kept hitting a road bump when creating calendars as the folks in the Southern Hemisphere could not be harmonized to the Northern Hemisphere with the same visible crescent New Moon. They would often be off by 2 days. It was alarming to me as the entire purpose was to harmonize all parts of earth to the worship cycles of their Creator in a 24 hour rotation of earth. Yet, it seemed impossible.

One day when sharing with a fellow believer the words came out of my mouth that the only option for the true New Moon was either the dark conjunction lunar phase or the full moon. Then we both laughed. We well knew that Scripture defined the ruling moon as a beacon of LIGHT. So the dark moon was disqualified. To my knowledge at that time there had never been a time in history when any nation utilized the full

moon as the New Moon. So while I was willing to consider all things, it didn't seem as though the full moon would prove out to be true.

Then something changed in the summer of 2012, I found myself after all these years having to face whether Ellen White of the Seventh-day Adventist Church was a true prophet after all. This was the most difficult thing for me at that point. After reading the book, [“The Life of Ellen White,”](#) I had the answer, and to my chagrin discovered she was not. Although not consciously seeking it, this painful yet stunning progress forward on the path of truth had released me from the chains that had bound me to the crescent lunar phase as the New Moon. I was astonished as I felt a weight had lifted.

Within days I began praying for additional light on the true and authentic New Moon. Was it the full moon after all, I prayed? If so I will accept it. I declared, *“I believe, but help my unbelief.”* That night and each night for the entire week I was awakened at midnight with Scripture verses that supported the full moon as New Moon. These truths were so new to me, that it forced me out of bed to write them down on a note pad in my office.

By the end of the week I had several pages of documentation. Now equipped with marvelous evidence, I declared aloud, *“I believe! But I need hard evidence for when the Year begins with the full moon if anyone else is going to believe.”* It was clear to me that the barley harvest was not the ruler of time, but evidence that the year had begun. Instantly the answer came like a lightning bolt from heaven! Revelation 12:1 *“And there appeared a great wonder in heaven; a woman clothed with the sun, and the **brilliant moon under her feet**, and upon her head a crown of twelve stars.”* It was mind blowing. I was so excited and filled with awe to the Creator for leading me on this most amazing path of discovery.

That very day I went back to my Stellarium software and discovered that the full moon is the only lunar phase that rises at the feet of Bethulah (Virgo, the woman) in the spring. Previously, I had tried unsuccessfully to produce the picture painted in Revelation 12:1 using a crescent moon. But now there it was the full moon at Bethulah's feet arising together on [The East-West Time Continuum](#). I was stunned. Again I was in awe of how the Most High had provided when I had been lost in the crescent New Moon dilemma.

I called many folks on the phone and emailed everyone, telling of my discovery. Yet, only a handful saw this light of truth as I did.

Immediately, the entire website received an overhaul to change crescent new moon material to that of the full moon that would occur most years at the feet of Bethulah in the spring. This has remained consistent until last year when I began to doubt myself and was seeking a second witness. You see I have discovered that although some things can be strongly believed to be correct, we must always be willing to submit them to the altar of sacrifice. Sometimes I even have to prove to myself that I am truly submitting. It does remind me of Abraham being willing to offer up Isaac as a sacrifice, for the simple reason that Yahuah the Most High had asked him to. If for no other reason it proved Abraham's trust in Yahuah.

---

Last year 03-2020, when making the calendar and considering all criteria, I felt compelled to make some changes, to test the waters so to speak, to the arrangement previously utilized in the Metonic 19-year cycle and the consequent full moon at Bethulah's feet to start the year. I wasn't questioning the Most High, but myself. Most of the reason for this was that I had not yet found a second witness for placing the full moon at Bethulah's feet. I needed to test it out, for fear I was missing something. Considering all that may have been manipulated in Scripture, and suggestions by others to the effect that Yahuah would naturally use the head and not the feet of Bethulah to commence the year. Was this a simple case of man's surmising? Possibly. But it was driven by the necessity to get it right and know for sure. For the calendar must be correct at all cost, in spite of my own humanity and fallen nature. I needed a second witness.

Again, last year 03-2020, I ended up choosing principles supporting the first full moon after the Vernal Equinox. With this new arrangement of the Metonic 19-year cycle, the New Year began with the full moon at Bethulah's head and waist more often, and rarely at her feet. This new method appeared to be substantial as it did have some historical support and it seemed to utilize more overtly each of the sun, moon, and stars. At the time I removed two of the articles that had supported the full moon at Bethulah's feet, so as not to lead anyone astray while testing this theory.

The chart below illustrates nearly three Metonic cycles of years, but uses the Vernal Equinox, as the reference point instead of Bethulah (Virgo) during last year. With this system the sun will rarely, if ever be in the constellation of Aries in the middle of the first lunar month of Nissan (Aviv).

### CREATOR'S ASTRO-LUNI-SOLAR CYCLE (CALS Cycle)

Interestingly enough, my quest last year, did not affect the calendar that we are just now completing. And it gave me prayerful time to consider it. The closer we came to the start of this next year, I knew I had to find the answer as the calendar for 2021-2022 would be affected. I created the calendar as planned, but I didn't have peace in my heart. The last thing I want is to lead anyone astray. I needed to have certainty that the New Year, Rosh Hashanah, was designed by our Creator to commence most years with the full moon at Bethulah's feet.

This last week I received a simple nudge in a kind hearted email that caused the beginning of several concepts to realign. Then I shared the entire story with my brother regarding the dilemma. As we talked I revealed to him the incredible quote by Flavius Josephus (1<sup>st</sup> century A.D.), who claimed that at the time of Moses and the Exodus from Egypt, the sun was in the constellation Aries in the middle of the first lunar month of Nissan by daylight. The reason this is so amazing is that we have Scriptural proof that the same phenomena occurred at the time of the Messiah, as on Passover, the 14<sup>th</sup> of Nissan (Aviv) the sun was in the constellation Aries, but so was the conjunction lunar phase.

Incidentally, under normal conditions, the constellation Aries is not visible in the spring or in the middle of the month of Nissan as it is only in the sky by daylight at this time of year. This constellation of Aries stars are only visible in the event of a solar eclipse. However, Aries does rule the night sky beginning in the Seventh Lunar Month along the east-west time continuum.

I had written an article on this nearly ten years previously, but never published it, intending it for my book reveal. It was to be the keystone of evidence for the correct start of the year as well as challenging the popular theory of the "*Precession of the Stars*." I had lost sight of its application, and that it was the second witness I was seeking. It needed some time-consuming illustrative charts to support it before it could be published. Now it was all brought back to me. And how marvelous it is indeed. I will be working on that.

This illustration depicts the full moon nearest the feet of Bethulah. From this point and from earth's vantage point fourteen days later by day (meaning the arrow points in the opposite direction) the SUN will be in the constellation of Aries the Lamb.

So it is that I have a renewed peace and trust that the full moon was preordained by the Creator to mark the feet of the constellation Bethulah to identify New Year's Day (Rosh Hashanah). Then 14 days later both the sun, and the dark conjunction lunar

phase will be in the constellation of Aries by daylight. This is the evidence I was seeking, which I had all along, but had lost sight of in the deep dark recesses of my computer files.

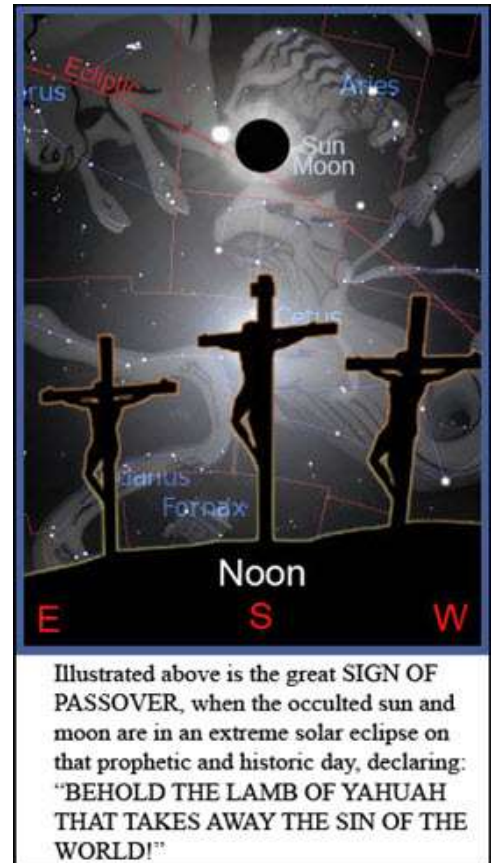

The following is from the article, [“The Sun was Darkened from the Sixth to the Ninth Hour.”](#) What profound and important details can be surmised by the sun and moon in the constellation Aries?

The real miracle of gross darkness that day may have been two-fold: 1) The extraordinary length of time the *solar eclipse* lasted, from start to finish, and 2) The intensity of the darkness it created so the visible stars could tell their story and reveal redemption’s long-promised mystery. As mentioned earlier, all that would have been necessary from Divine intervention would have been to bring the moon either closer to earth or cause the moon’s orbit to harmonize with the sun for three hours.

Also mentioned earlier and recorded by Phlegon, this solar eclipse occurred in the fourth year of the 202nd Olympiad. *“Its darkness was so complete that the stars could be seen in the shamayim (heavens), and there was a great earthquake.”* As stated earlier, this earthquake may have even been the result of the moon being brought closer to the earth.

That which is recorded here must not be overlooked with regards to the stars shining at noon. In addition to the Hebrews, the Greeks were expert astronomers who fully utilized the sun, moon, and stars for all their timekeeping. So what might the sorrowing and compassionate Eternal Father want to portray through an epic three-part orchestrated event of the sun, moon, and stars?

As a “*sign*” portrayed in this image, if a conjunction moon “darkened the sun” that day for an unusually long “solar eclipse,” not only would the stars nearest their

placement to the sun be visible, but their placement told the long awaited story of a most profound nature.

On this year, month, and day, both the sun and the moon would have been centralized to one location in the shamayim (heavens), which was in the constellation Aries, at the feet of the lamb. Might our sorrowing Father above have orchestrated and utilized this timely astronomical event to announce to the whole earth, ***“Behold the Lamb of Yahuah, who takes away the sin of the world?”***

So what sign in the shamayim marks this day that could not occur on any of the other days? It is the Lamb slain from the foundation of the world portrayed in the starry constellation of Aries (Revelation 13:8). This supports the historical quote made earlier by Flavius Josephus that *“the SUN was in the constellation of Aries.”* The significance of this cannot be overstated, as only a solar eclipse could reveal this astronomic reality. Marked by a dark conjunction lunar phase and a darkened sun, the LAMB constellation came into full view directly overhead at noon.

---

We are all called to *“Launch Out into the Deep”* usually without a road map. At these critical moments sometimes it is all about a faith walk, and it is always about leaving our pride in the dust. Sometimes we are in error. At the end of the day, although my intense struggle to confirm truth took me off the path momentarily, it ultimately brought me back with the evidence I needed. It proved to me that only a Metonic Cycle that utilized the full moon at the feet of Bethulah most years, can start our Creator’s authentic Calendar Year.

This is confirmed with the second witness presented by Flavius Josephus with his historical record that the sun was in Aries in the middle of the first lunar month of Aviv during daylight, at the time of Moses, Passover, and the Exodus. Neither the Rabbinical Jews nor the Karaite Jews can meet this criteria as they utilize a dark or

crescent lunar phase as their New Moon, placing them 15 days early by default. Add to this that many years they begin their year in the middle of March, causing them to be 45 days earlier than those utilizing the full moon at Bethulah's feet for New Year's Day. For this disparity they claim the stars and by extension, the Creator is at fault for allowing the constellations to slowly move forward 45 days over the past 3,150 years, which they call the "*Precession of the Stars.*" That assumption, in all actuality, declares the Creator not capable to keeping His clock/calendar accurate, allowing it to fall into disrepair. Take this to the next level and who will ever trust that they must be faithful to keeping a New Moon, seventh-day Sabbath, or Feast Day sacred, if synchronization to the worship rhythms has all fallen apart. The Master Creator I serve remains in full control of His trinity of lights for calendation, and when there is error it is always human error.

Please note that the current calendar was not affected over this past year and to this day. However, in restoring the truth that the full moon at the feet of Bethulah was indeed ordained to announce New Year's Day (Rosh Hashanah) the next morning, it affects the length of the current year and the upcoming year. The current year is to be the *thirteen month* year extending through April 26, 2021. **New Year's Day (Rosh Hashanah) will commence on the morning of April 27, 2021 and will be the beginning of a twelve month year.** For all who have your calendars printed or marked on the Gregorian calendar, all the Feast days will need to be moved to the following month. The New Calendar for 2021-2022 has been posted. Remember to refresh your browsers to be able to see the updates.

I know some of you ask your employers for Feast Days off-work long in advance and others have taken tedious time to prepare your calendars for the year. My sincerest apologies for how my struggle for truth has affected each of you. This is one of the many times my pride is put to the test, but I do hope that you can find it in your hearts to forgive me for the effect that has had on your best laid efforts to post your own calendars early.

Sincerely, your friend and fellow truth seeker,

Kerrie French
