

Shabbat Shalom, all who worship Yahuah Alahim and Yahusha haMashiach on their Kadosh (set-apart) New/Renewed Moons, Lunar Sabbaths, and Feast Days according to the full moon as the start of His lunar months!

<https://www.youtube.com/watch?v=FUb6QjzvRXU>

Today is the **22nd day** of our Creator's **First Lunar Month** count, in which the year begins in the spring. It is also the authentic **third lunar Sabbath of the month**. It looks like **01-22-5994**. It coincides with the Roman Gregorian calendar planetary date of *Sun., 05-04-2025*.

Our Creator placed His full moon beacon as the original New Moon and the start of His months, high above for all to see. All praise to Yahuah Alahim for His steadfast love and compassion for His children and His patience in restoring His lost truths in preparation for the Second Coming of His Son, Yahusha haMashiach (the Messiah). Simply because the full moon as New Moon, with its count to Lunar Sabbaths and annual Feast Days, is not popular among the Rabbinical Pharisee Jews or the Romanized Christian churches today, does in no way diminish its **LIGHT OF**

TRUTH shining from the pages of Scripture and His Eternal Throne. Only Yahuah's Ruach (power, presence, and provision) gives those who seek Him with all their hearts "*eyes to see and ears to hear.*" Ask Him today to reveal His New Moon and lunar Sabbath to you and see how your life will change as your soul temple is synchronized to His for all eternity.

"Blessed are those who hear the joyful call to worship, for they will walk in the light of your presence, Yahuah. They rejoice all day long in your wonderful reputation. They exult in your righteousness."
Psalms 89:15-16

Kerrie's Korner:

I pray all of you had a blessed Passover, and seven days of Unleavened Bread remembering that during our earthly sojourn Yahusha haMashiach is our sustenance, our bread of life. I very much enjoyed having a little homemade matsa at every meal, dipping it in the grape juice in remembrance of all that He did so long ago to save us.

As you know I have struggled over the years to bring harmony to the layout of all the Feast Days. This has consistently been an incredible source of stress. I felt I had part of the formula, but felt I was juggling more than the number of pieces that needed to fit. During this last month while my website was down I was praying extensively and was led to create **The Menorah Sacrifice Schedule, The Creator's Master Key of Time**. And everything seemed to just fall into place. I have begun an article to explain it that will go something like what is written below. Please know that this will soon be reflected in the calendars.

The Menorah Sacrifice Schedule

I have begun an article to explain it that will go something like this:

The Master Key of Time

[T]he sacred record preserved in the books of Leviticus and Numbers offers far more than a list of ceremonial requirements; it holds within it the divine blueprint of sacred time itself. Beneath the layers of prescribed sacrifices lies a carefully designed framework, a "Master Key," through which the Creator's system of measuring time and unfolding prophecy is revealed. In particular, Leviticus 23 and Numbers 28–29 serve as the foundational "Rules of Engagement," establishing not only how and when to worship, but also unveiling the Creator's intended celestial rhythm for His covenant people.

Here, encoded within the sacrifice schedule, are the hidden secrets that validate the use of the lunar cycle as the original method of measuring New Moon Days, work days, Sabbaths, and prophetic Feast Days. These revelations, long obscured by human tradition and solar-based paradigms, invite every truth-seeker to rediscover the original, divinely-ordained calendar, one upon which the entire Plan of Salvation was *signed* in Eden, *sealed* at the cross on Passover, and will one day soon mark the *deliverance* of His people.

Secrets Revealed by the Master Key of Time

What follows is an exploration of three secrets encoded in the sacrifice schedule, each of which testifies that the Creator's calendar was, and remains, written not in human decree, but in the heavens themselves.

1. **The first secret illustrated by the Sacrifice Schedule is that there are *three kinds of days each month*.** These are the New Moon Days, the work days, and the lunar seventh-day Sabbaths. Each of the three kinds of days is uniquely quantified by the prescribed sacrifices, never to overlap or be altered. Each of the Feast Days holds a divinely prescribed position within the lunar month, faithfully maintaining the sacred count that begins with the full New/Renewed Moon. In doing so, each Feast not only preserves its original timing but also highlights its relationship to the lunar Sabbaths, anchoring both the weekly and annual rhythms of worship to the very same lunar celestial timepiece.

For example, each lunar year, *Passover* is counted *fourteen days* from the Full New/Renewed Moon. It is not a coincidence that the very next day after Passover of every year is the seventh-day Sabbath, the 15th of the lunar month, locking it in for all time. Stunningly, the seventh-day Sabbaths each month thereafter also occur on the 8th, 15th, 22nd, and 29th of each lunar month.

2. **The second secret revealed by the Leviticus 23 and Numbers 28 Sacrifice Schedule below is that all Biblical time measuring is lunar.** Neither a solar calendar nor its rhythm can be found anywhere in Scripture. This is illustrated by the specific number of lambs, rams, and bulls to be sacrificed on each kind of day. As it turns out, Scripture identifies *three kinds of days* that can never overlap for the very reason each is represented with differing sacrifices. Together, the Menorah's lunar phases and the sacrifice schedule serve as a GPS to align each kind of day to the lunar phases, ensuring there is no overlapping of kinds of days or a departure from the sacred lunar calendar.
3. **The third secret revealed is that the seventh-day Sabbath is based on the lunar calendar.** It is consistently measured from one New Moon to the next

(Isaiah 66:23). No other pattern exists in Scripture, but only in the deep-rooted solar paradigms of modern mankind.

The Creator's Restoration of His Calendar

Few today seem to recognize that the Creator's lunar Calendar was restored to Israel just 14 nights before the first Passover and 15 nights before leaving Egypt for the Promised Land. Consider what may have occurred had ancient Israel chosen to ignore Yahuah's *180-degree* calendar restoration, given to the people through Moses and Aaron on the night of the full moon in spring so long ago (Exodus 12:1-3). For if Israel had refused to accept the first full moon in spring as the original New Moon and relinquish the dark conjunction lunar phase utilized by the Egyptians, they would have been off by half a month for Passover and would have, no doubt, lost all their firstborn sons, along with the Egyptians. Absolutely no one who refused to synchronize their life to that of the correct New Moon of the Creator's Calendar ever made it to the Promised Land.

*"And declared Yahuah unto Moses and unto Aaron, in the land of Egypt, commanding that: The **New//Renewed Moon**, this self-same one, is the beginning (Rosh) of **lunar months**; it is **the first lunar month of the year** (HaShanah). You shall keep and teach this to all the congregation of Israel saying, **"In the tenth of the lunar month**, do the following: And you shall reserve and keep every man a lamb for each household of the father, a lamb for each house." Exodus 12:1-3*

*"And you shall keep it until the **fourteenth day of the same lunar month...**" Exodus 12:6 ([View the Hebrew Word Study evidence here.](#))*

The principles remain the same today for those who seek restoration to the Father and entrance into the eternal home, the final Promised Land. The first test for determining Passover on the 14th day of the first month involves recognizing that the Creator's Calendar has always been lunar, and second, that the full moon has always announced the first day of the year, Rosh Hashanah, as well as the beginning of each lunar month.

Lunar Sacrifice Rhythm – Paradigm Shift

It is one thing to grasp the symbolic meaning of each element, such as furnishings, within the Sanctuary and Tabernacle. Still, quite another to perceive its full significance as it operates with specific sacrifices in living sequence—daily, weekly, monthly, and annually—according to the Creator’s ordained rhythm.

Many of us believed the seven annual Feast Days were made up of the following seven in this order:

Passover
Unleavened Bread
Wave Sheaf
Feast of Weeks/Pentecost
Trumpets
Day of Atonement
Feast of Tabernacles

Upon further study, we have discovered it is somewhat different, as each is tied to specific sacrifices and preordained lunar phases.

The Menorah and the Sacrifice Schedule – The Master Key of Time

The detailed sacrificial prescriptions recorded in Leviticus 23 and Numbers 28–29 function as what might be termed our *Creator’s Rules of Engagement*. In this light, the sacrificial calendar with its Menorah lunar ties is established as the **MASTER KEY of TIME and PROPHECY**. As the *Master Key*, it unlocks both the measure of sacred time and the unfolding of prophecy by revealing the precise pattern of years, months, weeks, and days within the lunar-appointed system upon which the Plan of Salvation is fulfilled.

In the Sacrifice schedule below, note that every single day of the year, there was the daily sacrifice of two lambs – one in the morning and one in the evening. On Sabbath, two male lambs were sacrificed, plus the morning and evening sacrifices. Then, on the New Moon Day, there were two bulls, one ram, seven lambs, and one goat sacrificed, plus the morning and evening sacrifice. Of profound importance, the sacrificial schedule illustrates a distinction between these *three kinds of days* as color coded below (purple, blue, and yellow). It ties the sacrificial system to the Creator’s calendar, as manifest by lunar phases in the heavens. As long

as this dual system was utilized to harmonize each sacrifice with its unique lunar phase, the correct lunar calendar model was followed without error or deception.

This system of identifying each day and lunar phase with its own unique set of sacrifices ensures that the Creator's original and authentic Calendar would never make an error by mixing a New Moon Day with a work day, a Sabbath, and vice versa. The Tabernacle's Sacrificial system was ordained to number all days of the lunar year and highlight each of the *three kinds of days* at their divinely appointed placement, as manifest to ensure Yasharal (Israel) understood the unalterable position of each, either for work, or rest and worship. This pattern was strictly upheld and guarded by the priesthood during Israel's periods of faithfulness, ensuring that the Temple ceremonies were aligned with the very throne room of heaven itself.

To our surprise, each authentic seventh-day Sabbath is synchronized with its count from the New Moon Day, fixing it to the 8th, 15th, 22nd, and 29th day of each lunar month consistently every year.

The inseparable bond between lunar timekeeping and every day of the month and year permeates every facet of sanctuary worship—from its daily morning and evening sacrificial system to the prophetic unfolding of the Messiah's redemptive ministry.

While we were all taught that there are only two kinds of days, workdays and Sabbaths, this remains true, but only for four weeks each lunar month. According to the *Master Key of Time*, the seven-day week was fashioned to cycle four times each lunar month; strikingly, this cycle is disrupted by the placement of the New Moon Day each lunar month.

The lunar phases, together with the sacrifice schedule, correspond as a GPS to ensure the synchronization of worship on earth with the heavenly courts above. As long as these rules are adhered to, the Creator's correct holy days can be found and celebrated in accordance with His unique and ordained worship rhythm. Any variance, large or small, will never harmonize those seeking faithfulness to their Messiah and Eternal Father.

Some Feast Days have been hidden, some rearranged, but in Yahuah's will and timing, these are now restored after nearly 2,000 years. Why? Because just as He restored His calendar to Moses and the captive Israelites before leaving Egypt bound

for the Promised Land (Exodus 12:1-3), the same is true for His followers today before they can enter His eternal Kingdom.

Feast Day Arrangement Explanation

The Menorah, the Gold Standard of Time, together with the Sacrifice Schedule, establishes all the lunar appointed Feast Days to occur on either a full moon or a dark moon, except the final Feast Day of Yom Shemini (the Eighth Day).

- Today, the Jews erringly celebrate **Rosh Hashanah** in the fall, so we have restored it to the spring as the start of the Festival year, just as it was 15 days before the Exodus. Exodus 12:1-3
- The original Hebrew Scriptures provide the hard evidence for placing the **Feast of Weeks** on the first day of the fifth lunar month, and not a 50-day count. [Hebrew Word Study Evidence Link](#).
- The **Feast of Tabernacles** represents the 1,000 years in heaven, a temporary dwelling before the earth is made new, where the saved will live forever with their Messiah.
- The **Feast of Trumpets** announces the Messiah's return in real time upon the very day of this seventh full moon as a rehearsal each lunar year of that final and greatest event to be joyfully experienced by the saved at the end of the 6,000 years.
- This places the **Day of Atonement** on the 15th day of the sixth lunar month, two weeks before the Feast of Trumpets, and on the day of a dark moon. This provides the required two weeks, *the space of half an hour* (Rev. 8:1) between the Day of Atonement and the Second Coming. This reality makes it impossible for the Day of Atonement to occur on the 10th day, a mid-week designation in the seventh month (10 days after the Second Coming). The *10th day of the seventh month*, for the Day of Atonement in Leviticus and Numbers, is now attributed to the lying pens of scribes (Jeremiah 8:8). Refer to the article, [The Lying Pen of Scribes](#).

In John 11:9, the Messiah defines that a day is twelve hours in length, which does not include the night. When applied to prophetic time, we get the following model that applies to the two-week distance between the Day of Atonement and the Feast of Trumpets, ensuring that the Day of Atonement falls on the 15th day of the sixth lunar month, two weeks before the Second Coming on the Feast of Trumpets:

Prophetic Space of Half an Hour Revelation 8:1
1 Day of 12 hours = 1 year of 12 lunar months (John 11:9)
1 hour = 1 lunar month
½ hour = 2 weeks (half of a lunar month)

Prayer:

O Sovereign Yahuah, Eternal Creator of time and truth, we praise You for the light of Your Word and the brilliance of Your heavenly design.

Thank You for preserving within the scrolls of Leviticus and Numbers a sacred blueprint, a Master Key of Time, which unveils the rhythm of Your appointed worship.

We stand in awe that each sacrifice, each feast, and each lunar phase was divinely appointed to guide our hearts into harmony with the courts of heaven.

Forgive us, Father, for the years we walked in ignorance, aligned to man-made calendars and traditions that obscured Your holy rhythm.

Restore to us the joy of Your original design, as You did for Israel on the eve of their exodus from Egypt, calling them to count from the full moon as Your appointed New Moon.

Let us not be found outside the timing of Your deliverance, but instead counted among those who prepare by faith to meet You in Your sacred time.

You have encoded Your truth in the very skies, and by Your Ruach haKodesh, You are awakening hearts to see and respond.

We thank You for the consistency of Your calendar, anchoring Your true seventh-day Sabbaths and Feast Days to the lights You placed in the firmament.

O Yahuah, teach us to number our days according to Your wisdom, and to delight in Your New Moons, Sabbaths, and annual mo'edim as rehearsals of eternity.

Let the sacrifices that once testified through blood now echo in our hearts through the blood of Yahusha, the Lamb who fulfilled them all.

Help us discern between the three kinds of days You established—New Moon Days, work days, and Sabbaths—that we may walk uprightly in Your appointed rhythm.

Raise up faithful messengers to declare the restoration of Your timepiece and guide others into the light of Your prophetic truth.

Cause the Menorah of time to shine once more upon Your people, illuminating the path of redemption as You designed it from Eden to the New Earth.

Let us be found watching and ready on the true Feast of Trumpets, having been sealed on the true Day of Atonement, and rejoicing in the shelter of Tabernacles. All praise to You, O Yahuah, for calling us back to Your appointed ways—for in Your calendar we find not only time, not only salvation, but YOU. May Your Name be Praise in All the Earth! HalleluYAH!!!

Barak hashem Yahusha haMashiach! (*Bless the name of Yahusha the Messiah!*)

The background is a painting of a landscape. A dirt path leads from the bottom left towards the center. The field is filled with dense, vibrant purple flowers. In the distance, there are some green bushes and a small white building. The sky is a mix of deep blue and white, with a large, bright white cloud in the upper left.
